DETAILED ACTION

Claims 1, 3-6, 14-20, 22-24, 27, 29 and 77-82 are pending in the application.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 4, 2009 has been entered.

Election/Restrictions

Applicant's election with traverse of Group I (claims 1-24, 27, 29 and 77-82 - drawn to products of

formula (1)) in the reply filed on August 22, 2008 was acknowledged in a previous Office Action. The requirement was deemed proper and therefore made FINAL in a previous Office Action.

Claims 30, 31, 34-37, 39-52 and 83-89 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on August 22, 2008. Claims 30, 31, 34-37, 39-52 and 83-89 have been cancelled per the Amendment filed February 25, 2009.

Rejections made in the previous Office Action that do not appear below have been overcome by Applicant's amendments to the claims. Therefore, arguments pertaining to these rejections will not be addressed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 5, 14-16 and 22-24 are rejected under 35 U.S.C. 102(b) as being anticipated by:

- a) the compound of CA Registry No. 302575-58-2 {indexed in the Registry file on STN November 13, 2000};
- d) Gorbulenko et al. {Khimiya Geterotsiklicheskikh Soedinenii (1994), (4), pages 464-471} see Compound XVII on page 465 (CA Registry No. 163126-67-8) or pages 4 and 19 of provided English translation of Gorbulenko et al.; or

e) Nawwar et al. {Collection of Czechoslovak Chemical Communications (1995), 60(12), pages 2200-2208} - see Compound XI on pages 2201, 2204 and 2205.

Each of the above cited prior art disclose at least one compound that is embraced by the instant claimed invention. Therefore, the instant claimed invention is anticipated by each of the above cite prior art.

Response to Arguments

Applicant's arguments filed September 4, 2009 have been fully considered. Applicant argues that the claims, as amended, are not anticipated by the compound of CA Registry No. 302575-58-2 (reproduced below).

```
L5 ANSWER 13 OF 14 REGISTRY COPYRIGHT 2008 ACS on STN
RN 302575-58-2 REGISTRY
ED Entered STN: 13 Nov 2000
CN 1,3-Benzenediol, 4-[4-(2-benzothiazolyl)-5-(trifluoromethyl)-1H-pyrazol-3-
y1]- (CA INDEX NAME)
MF C17 H10 F3 N3 O2 S
SR Chemical Library
Supplier: Otava
LC STN Files: CHEMCATS
```

In response, the compound of CA Registry No. 302575-58-2 is embraced by currently amended claim 23 when the instant R^1 represents hydrogen; the instant R^2 represents heteroalkyl (i.e., CF_3); the instant R^3 represents hydrocarbyl (dihydroxyphenyl); and R^4 represents hydrogen. Therefore, the compound of CA Registry No. 302575-58-2 does anticipate the currently amended claim 23.

Applicant argues that Gorbulenko et al. do not anticipate the current amended claims. In response, Compound XVII (CA Registry No. 163126-67-8 - reproduced below) in Gorbulenko et al. on pages 4 and 19 of the English translation is embraced by claims 1, 4, 5, 14, 15, 16 and 22-24 when the instant R¹ represents hydrogen; the instant R² represents amino; the instant R³ represents hydrocarbyl (which embrace a substituted phenyl - see instant claim 15); and R⁴ represents hydrogen.

Art Unit: 1626

RN 163126-67-8 CAPLUS
CN Phenol, 2-[5-amino-4-(2-benzothiazolyl)-1H-pyrazol-3-yl]-5-methoxy-4propyl- (CA INDEX NAME)

Therefore, Gorbulenko et al. do anticipate the instant current amended claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Aotsuka et al. {U.S. Pat.

6,136,831} and Huang et al. {U.S. Pat. 4,269,846}, each taken alone.

Determination of the scope and content of the prior art (MPEP \$2141.01)

Applicant claims pyrazolylbenzothiazole compounds.

Aotsuka et al. (see entire document; particularly columns 2-6, 9 and 10; and especially the compound in column 3, lines 66-67) and Huang et al. (see entire document; particularly columns 1, 3 and 4; and especially the 14th compound listed in the table in column 3 and Example 9 in column 9) each teach pyrazolylbenzothiazole compounds that are structurally similar to the instant claimed compounds.

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The difference between the compounds of Aotsuka et al. and the compounds instantly claimed is that the instant claimed compounds are generically described in the prior art.

The difference between the compounds of Huang et al. and the compounds instantly claimed is that the pyrazole ring is attached to the 2-position of benzothiazole ring at the 3-position of the pyrazole ring instead of the 4-position as instantly claimed.

Finding of prima facie obviousness--rational and motivation (MPEP \$2142-2413)

The indiscriminate selection of "some" among "many" is prima facie obvious, <u>In re Lemin</u>, 141 USPQ 814 (C.C.P.A. 1964). The motivation to make the claimed compounds derives from the expectation that structurally similar compounds would possess similar activity (e.g., an anti-inflammatory).

Further, position isomers are a basic form of close "structural isomers." MPEP 2144.09, second paragraph, states, "Compounds which are position isomers ... are generally of sufficiently close structural similarity that there is a presumed expectation that such compounds possess similar properties." Therefore, nothing unobvious is seen in substituting the known

claimed isomer for the structurally similar isomer, as taught by Huang et al., since such structurally related compounds suggest one another and would be expected to share common properties absent a showing of unexpected results. *In re Norris*, 84 USPQ 458 (1950).

One skilled in the art would thus be motivated to prepare pyrazolylbenzothiazole products embraced by Aotsuka et al., or alternatively positional isomers as taught by Huang et al., to arrive at the instant claimed products with the expectation of obtaining additional beneficial products which would be useful in treating, for example, inflammation. The instant claimed invention would have been suggested to one skilled in the art and therefore, the instant claimed invention would have been obvious to one skilled in the art.

Art Unit: 1626

Allowable Subject Matter

Claims 3, 6, 17-20 and 78-80 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 29, 77, 81 and 82 are allowed over the art of record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura L. Stockton whose telephone number is (571) 272-0710. The examiner can normally be reached on Monday-Friday from 6:00 am to 2:30 pm. If the examiner is out of the Office, the examiner's supervisor, Joseph McKane, can be reached on (571) 272-0699.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system,

Art Unit: 1626

see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

The Official fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
